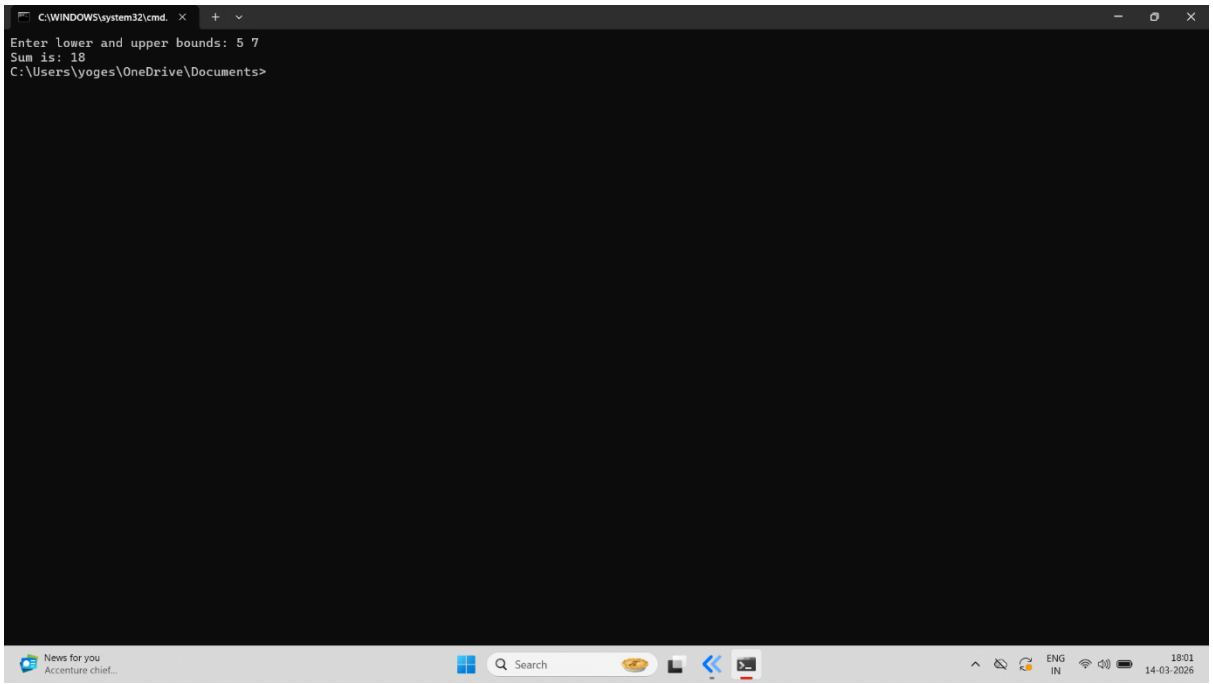
```
#include<iostream>
using namespace std;
class A
{
  protected:
   int a,b;
  public:

    void read()
    {
        cout << "Enter lower and upper bounds: ";
        cin >> a >> b;
    }
};
class B: public A
{
  public:
  void Sum()
  {
    int s=0;
    for(int i=a;i<=b;i++)
    {
      s+=i;
    }
    cout<<"Sum is: "<<s;
  }

};

int main()
{
```


```
    B obj;

    obj.read();
    obj.Sum();
    return 0;
}
```
